PROFILE

I'm a young **Japanese raised in Italy**. Very excited to participate in **new projects/startups** and **grow together**! Due to the **multi-culturality** between **Japan** and **Italy**, I feel that I have a more **open mind** that can surely be helpful to you and **be a bridge between Europe and Asia.** I'm also a **Front-End, Back-End** junior Web Developer!

SKILLS

- **Design Thinking**
  - Adobe Illustrator, Photoshop
- **Front/Back End coding skills**
  - Html, css, javascript, VueJs
  - Php, MySql, Laravel 9
- C, C++, Arduino basic knowledge
- **Problem-Solving**
- **Excellent creativity and craft skills**
- **Multi-language:**
  - **Japanese, Italian (both native)**
  - **English**

PASSIONS

I have no real work experience, so I would like to talk about my interests and passions:

- **Product design**
- **Car and Motorcycle industry**
- **IT technologies**

These are my main interests. Since childhood I have liked to create things. I like making projects where I create products, and cool things. From researching materials and planning to building prototypes. Many times I had complications during my projects but I never gave up and managed to achieve the desired result.

If there were problems I always looked for solutions, even searching through the internet and asking to experts.

I would be happy if you looked at my projects. (Scan the QR code)
